DETAILED ACTION

The **FINALITY** of the Office action dated May 25, 2006 has been withdrawn. Applicants' amendment(s) dated August 25, 2006 has been entered. Prosecution on the merits of this application is reopened on claims 1-11 considered unpatentable for the reasons indicated below.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Applicants' Disclosure of Admitted Prior Art as illustrated for, example, by Johann Stichlmair in Grundlagen der Dimensionierung des Gasl/' Flüssigkeit-Kontaktapparates, Bodenkolonne, Verlag Chemie, Weinheim, 1978.

Applicants admit that Johann Stichlmair in Grundlagen der Dimensionierung des Gasl/' Flüssigkeit-Kontaktapparates, Bodenkolonne, Verlag Chemie, Weinheim, 1978, ' suggests or teaches the separating action of sieve trays with entrainment fractions of up to 30% by weight. See page 7, lines 17-21.
